

10-Year Durability Warranty on All Fastening Systems Supplied by Philadelphia Solar .

If any damage case occurs under normal stress within the warranty period despite correct installation and handling, Philadelphia Solar shall immediately replace the constructional component in question.

The warranty is limited to additional delivery and assembly of the defective components upon notification of the damage within the warranty period. Possible legal warranty or liability claims shall remain unaffected.

The obligation to fulfil the warranty shall not apply if the damage has arisen due to defective installation or handling of the system or due to exceptional stress (e.g. storm damage, consequence of instability of the sub-surface, particular chemical or biological effects), unless the damage has verifiably not been caused by the factors mentioned above but essentially due to a material or construction fault. With regard to installation and handling, the technical product descriptions and installation instructions regarding the respective products as supplied by us shall apply as well as the legal and generally-recognized standards and principles of building and construction work as well as, as appropriate on a priority basis, the plans, structural analyses and instructions created by us individually for the customer. If a shorter durability of special components in general or for specific kinds of applications is explicitly stated, or if an exchange of certain components is scheduled within a shorter period of time within the framework of an individual planning created by us, the warranty period shall be limited to this accordingly shorter time of durability or period of time.

No claims can be made by the customer if the damage is covered or usually can be covered by an insurance against storm and similar events (natural peril insurance).

This warranty shall only cover claims made by our contractual partner who has to settle all warranty claims with us. Assertion by third parties shall only be possible if

Philadelphia Solar agrees thereto.

Warranty on Tracking Component.

5-year warranty on electromechanical and monitoring device
